

Satchell Evaluations Typography Services

on the shores of Lake Tahoe

When your typesetting and typography needs go beyond what you can do in-house with a word processor or simple publishing package, come to Satchell Evaluations Typography Services and have our typographer apply more than 40 years of experience in cold composition to your project. Using Adobe Pagemaker, Adobe Illustrator, and Microsoft Visio to their utmost, our typographer can create eye-catching designs that sell your ideas, products, or services.

Special effects can be as stunning as the one shown above, or they can be subtle such that the reader knows he's seeing something special, but can't quite put his finger on it.

Photographs are processed through Adobe PhotoShop as required, to isolate striking scenes from bland snapshots and create effects that adds appeal to your pages. Drawings are easily incorporated, with special type effects available such as close text fitting around irregularly-shaped graphic objects.

Making a book? We can help you find the right design, the right layout, and the ideal presentation of your subject.
